

DRILLMEC
DRILLING TECHNOLOGIES
a **TREVI**Group company

DRILLMEC Company profile

Created from the merging of five leading companies in the sector, DRILLMEC is the Trevi Group company specialized in design and construction of equipment for the oil industry. From the production of drilling rigs, to a wide range of drilling equipment, DRILLMEC is a sound reference for its technology with advanced solutions such as the Hydraulic Hoist (HH) technology, which allows time and costs reduction and a high level of safety, guaranteeing performances well above those of conventional rigs, allowing to drill up to 6,000 metres, both on land and offshore.

A company with a clear mission, which day after day guarantees safety, care for the environment, engineering development, reliability and excellent after sales service.

Today the recognized DRILLMEC know-how represents a certainty for a large number of worldwide contractors, who see it as an ideal partner to improve their performance and face the challenges of to-day's market.

Thanks to a marked innovation that represents true added value for the company, DRILLMEC is able to offer multiple solutions specifically engineered and designed to satisfy customer needs.

A wide offer of solutions coupled with a global service capability. Thanks to qualified engineers, DRILLMEC also offers the advantage of a careful customer assistance, providing rig control and testing, to optimise the performance and to meet the needs of any type of drilling.
